

Standard Operating Procedures

Pallet Handling

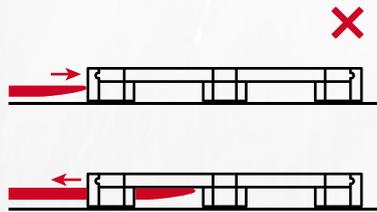

Enter straight and centre into the openings. Avoid entering at an angle and hitting legs.

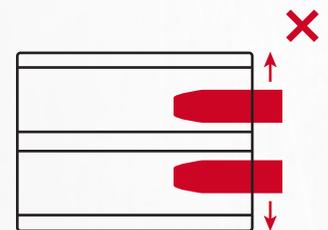

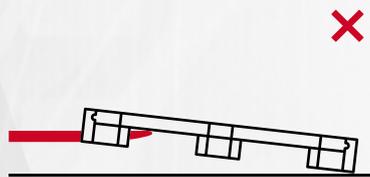

Lower the forks to the bottommost position before entering the pallet.

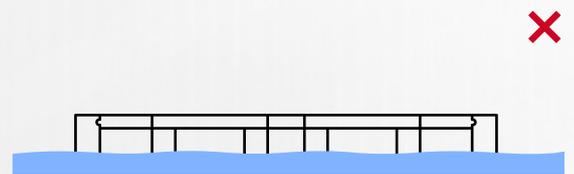

Insert the forks completely and lift to move. Do not drag or push the pallet.

Do not lift only half of the pallet to drag or move sideways.

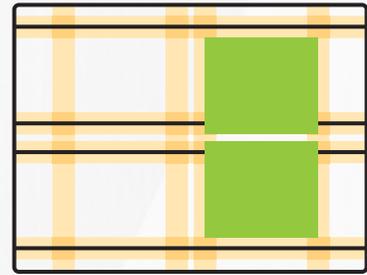

Avoid positioning pallet in standing water or snow.

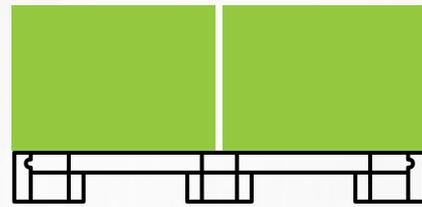

Pallet Loading

Position load to cover at least two different strong support areas of the pallet.

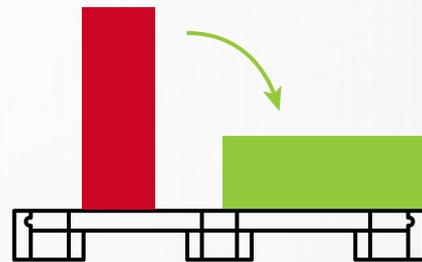

Strong support
Load

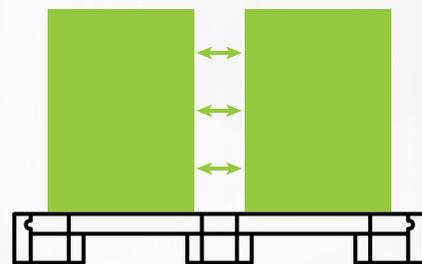

Place heavy and strong objects on the bottom and distribute the weight evenly.

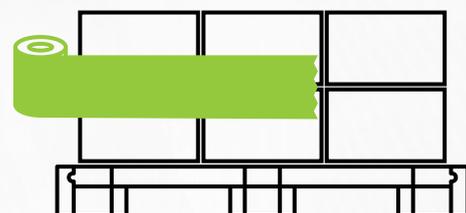

Lay down the load.

Avoid leaving space between individual items.

Wrap tight with plenty of wrapping foil.
